

CWC4 User Manual

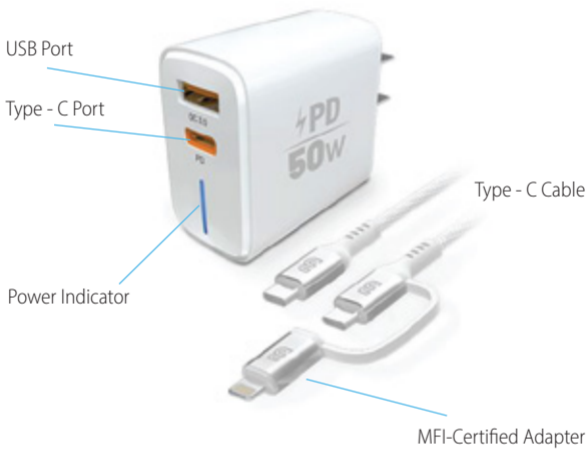

INTRODUCTION

Elevate your charging experience with the powerful 50W Combo Pack, designed to meet all your charging needs. This premium bundle includes a durable 4' nylon braided Type-C to C cable, an MFI-certified adapter for seamless Apple device compatibility, and a 50W ETL Approved Dual USB Wall Charger that delivers lightning-fast charging for multiple devices. Whether it's smartphones, tablets, or Apple products, this combo ensures efficient and safe charging at home, the office, or on the go. With robust construction and cutting-edge technology, this pack is the perfect combination of speed, durability, and versatility.

SPECS & FEATURES

- Wall Charger:
- Dual High-Speed USB ports
- PD C Port + QC 3.0 USB Port
- 50 Watts PD
- Overload Protection
- ETL Approved

PRODUCT OVERVIEW

HOW TO USE

Unbox and Inspect the Items

Check that the pack includes the following:

4' Nylon Braided Type-C to C Cable

MFI Adapter

50W Dual USB Wall Charger

Ensure there are no visible signs of damage to any component before use

Connect the Charger

Plug the 50W Dual USB Wall Charger into a standard AC wall outlet (100V–240V). Make sure the charger is securely connected and ready for use.

Charging Devices

For USB-C Devices: Plug one end of the Type-C to C cable into the USB-C port on the wall charger. Connect the other end of the cable to your USB-C-compatible device, such as a smartphone, tablet, or laptop.

For Apple Lightning Devices: Attach the MFI Adapter to the Type-C connector on the cable. Plug the adapter-equipped cable into your Apple device's Lightning port.

Simultaneous Charging: Use the USB-C port for one device and the USB-A port for another device. The charger will distribute power

intelligently, delivering fast charging to each connected device (up to 50W total).

Confirm Charging: Check your device for a charging indicator (e.g., charging icon or percentage increase). For fast charging, ensure your device supports Power Delivery (PD) and is connected to the USB-C port.

CARE AND SAFETY

Disconnect your device from the cable once fully charged. Remove the wall charger from the outlet if it is not in use to conserve energy. Do not overload the outlet or use extension cords that are not rated for high power devices. Ensure the charger has sufficient airflow and is not covered while in use. Disconnect the charger immediately if it becomes excessively hot during operation.

PACKAGE INCLUDES

4'ft Type-C to C cable + MFI Adapter
