

## UMC12 User Manual

### INTRODUCTION

Experience hands-free convenience and unparalleled flexibility with the Dashboard & Windshield Car Mount with Extendable Arm. Designed for drivers who value safety and functionality, this mount securely holds your smartphone, providing effortless navigation, call management, and music control while on the road.

Featuring a strong suction cup base, it can be easily attached to your car's dashboard or windshield. The extendable arm and 360° adjustable design allow you to position your device at the perfect viewing angle for a distraction-free driving experience.

### SPECS & FEATURES

- Works on most Windows & Dashboards
- 360° Rotation
- Extendable Mount Arm
- Easy to attach
- Extend Length of arm
- Anti-vibration construction reduces movement, providing a steady viewing experience while driving
- Customize to fit any iPhone/Android smartphone

### PRODUCT OVERVIEW

### HOW TO USE

#### Preparing the Mount

##### Unbox the Car Mount:

Remove the mount from its packaging and ensure all parts are included.

##### Clean the Surface:

Wipe the area on the dashboard or windshield where you plan to mount the device using a damp cloth. Allow it to dry completely for optimal suction.

#### Installing the Mount

##### Attach the Suction Cup:

Place the suction cup on the selected surface (dashboard or windshield). Ensure it is pressed firmly onto the surface to eliminate air pockets.

**Lock the Suction Cup:** Pull down the locking lever to secure the suction cup in place.

##### Adjust the Arm:

Extend or retract the adjustable arm to your preferred length. Position the arm to bring the mount closer or further as needed.

##### Set the Viewing Angle:

Use the 360° ball joint to tilt or rotate the mount for the best viewing angle.

#### Securing Your Smartphone

**Adjust the Clamps:** Squeeze the side clamps to open the holder to fit your phone size.

**Place Your Smartphone:** Position your smartphone in the mount, ensuring it is centered for balance.

##### Lock the Device:

Release the side clamps to secure your phone snugly in place.

#### Using the Mount During Drive

##### Access Your Device:

Use your smartphone for navigation, hands-free calls, or music control. Ensure you follow local laws for hands-free use while driving.

##### Adjust as Needed:

Reposition the mount or phone angle as needed for optimal visibility and comfort.

#### Removing the Mount

##### Release the Device:

Press the one-touch release button to remove your smartphone.

##### Unlock the Suction Cup:

Pull up the locking lever to release the suction cup from the surface.

##### Clean the Suction Cup:

Wash the suction cup under warm water and allow it to air dry if you plan to reuse it in another location.

### CARE AND SAFETY

Place the suction cup on a smooth, flat area for maximum grip.

If the suction cup loses its grip, clean it with warm water and reattach it once dry.

Avoid pulling the mount forcefully from the surface to prevent damage to the suction cup or dashboard.
