

50W Car Charger

GC7 User Manual

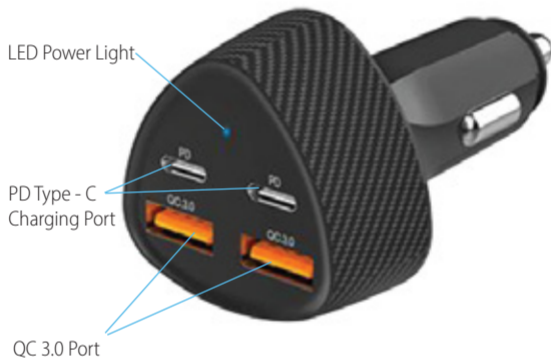

INTRODUCTION

A 50W Fast Charging Quad USB Car Charger is an essential accessory for anyone on the go, offering the convenience of charging multiple devices simultaneously while traveling. Designed for speed and efficiency, this compact yet powerful charger supports up to four devices at once, including smartphones, tablets, GPS units, and more. Equipped with advanced fast-charging technologies like Qualcomm Quick Charge, it ensures your devices are charged quickly and safely.

SPECS & FEATURES

- Quad High-Speed USB ports
- Dual C Ports + Dual QC 3.0 USB Ports
- 50 Watts
- Overload Protection

PRODUCT OVERVIEW

HOW TO USE

Prepare the Charger

Ensure the car charger is compatible with your vehicle's cigarette lighter socket (12V-24V, standard in most cars and trucks).

Plug It In: Insert the car charger into your vehicle's cigarette lighter or power outlet. Once connected, an LED indicator (if present) will light up to show that it's receiving power.

Connect Your Devices"

Use compatible USB cables for the devices you want to charge. Plug one end of the USB cable into the car charger and the other end into your device.

Monitor Charging: Ensure the device begins charging. Some ports may offer faster charging speeds (e.g., Quick Charge 3.0/4.0 or USB-C Power Delivery), so check if your device is connected to the appropriate port. Most chargers automatically detect the device's power needs and optimize charging speed.

Safely Remove When Done: Once charging is complete, unplug your devices. You can leave the charger plugged in when the car is off if the socket doesn't supply power while the car is off. Otherwise, remove it to avoid unnecessary battery drain.

CARE AND SAFETY

Ensure that the charger is compatible with your devices. Use high-quality cables to avoid overheating or damage to your devices. Avoid overloading the charger beyond its maximum capacity (e.g., charging 4 power-hungry devices simultaneously may slow charging speeds). Keep the charger clean and free of debris for optimal performance.
